LEONARDO ANTONIO GONZÁLEZ

Full Stack Developer

Tucumán, Argentina | +54 9 381 338-0751 | leonarddevweb@gmail.com
linkedin.com/in/leogonzalez-dev | github.com/LeonAntGon

PROFESSIONAL SUMMARY

Full Stack Developer with strong frontend expertise in React, Next.js and TypeScript, and hands-on experience integrating Artificial Intelligence into software products. Skilled at building production-ready web applications with authentication, admin dashboards, payment and social APIs, and Retrieval-Augmented Generation (RAG) / LLM pipelines. Recent projects include an AI legal-research platform, a short-term rental booking system with real-time Airbnb calendar synchronization, and multiple client websites and e-commerce builds.

TECHNICAL SKILLS

- **Frontend & Mobile:** React, Next.js, TypeScript, JavaScript, Tailwind CSS, React Native
- **Backend & Databases:** Node.js, Express, Python, PostgreSQL (pgvector), Supabase, MongoDB, REST APIs
- **AI & Integrations:** LLMs, RAG, OpenAI, Google Cloud (OCR), Mercado Pago, Meta / Instagram APIs
- **Tools & E-commerce:** Git, Docker, Figma, Tiendanube, Shopify, Vercel

PROJECTS

Ulpiano AI — Legal Litigation Platform (RAG)

2026 | ulpiano.net | Next.js, Node.js, PostgreSQL (pgvector), LLM APIs

- Built a Retrieval-Augmented Generation (RAG) assistant that ingests images and documents into the system's memory and analyzes them in context.
- Generates legal answers and litigation strategies grounded strictly in jurisprudence, national and provincial laws, and the Criminal Procedure Code.
- Designed the evidence-to-legal-framework pipeline that instantly cross-references case data with the exact applicable regulations.

Zentt — Short-Term Rental Booking Platform

2026 | zentt.agency | Next.js, Node.js, third-party API integrations

- Delivered a per-host website system that enables direct bookings, reducing dependency on and commissions from intermediaries.
- Integrated automatic Airbnb synchronization to keep availability calendars updated in real time and prevent double bookings.
- Centralized property and reservation management in a single dashboard, optimizing the owner's operational time.

Lencería Yas — E-commerce Website with Admin Panel

2026 | lenceriayas.shop | Next.js, Clerk (authentication), database-backed CMS

- Designed a user-centered UX/UI tailored to the brand's visual identity.
- Built an admin panel to manage content such as images, product categories and customer reviews.
- Implemented secure authentication with Clerk.

Inmonuevo — Real Estate Website

2026 | inmonuevo.com.ar | React, Next.js, Vercel, Google Analytics

- Modernized an outdated landing page using React and Next.js, deployed on Vercel to eliminate hosting costs.
- Implemented Google Analytics and registered the site in Google Search Console for indexing and performance tracking.

La Guarida del Zorro — Cabins & Suites Website
2026 | guaridadelzorro.com

- Developed a promotional website for a cabins and suites complex, presenting accommodations, amenities, a media gallery and location.
- Structured listings with capacity and details to support direct customer inquiries and reservations.

Cabañas La Norita — Cabin Rental Website
2026 | cabañaslanorita.com

- Built a client website presenting cabins with detailed information, rates and availability, plus a contact form for reservations.

CERTIFICATIONS

- **Associate AI Engineer for Developers** — DataCamp, 2025
- **Data Analysis with Python** — Udemy, 2025
- **Automation with Zapier** — Platzi, 2025
- **Google Search Console** — Platzi, 2025
- **Technical SEO** — Platzi, 2025
- **Introduction to Databases for Back-End Development** — Meta (Coursera), 2024
- **Programming in Python** — Meta (Coursera), 2024
- **Front-End Development Specialization** — Meta (Coursera), 2023
